

SPECIAL AEROSPACE

Our machines dedicated to Aerospace Industry and Composites Applications

AEROSTRUCTURES

- *Riveting machines with C Frame structure, riveting robots, nacelle riveting systems, manual, semi automatic or automatic riveting systems*
- *Aluminum or carbon profile machining (for stringer, aircraft floor...), and CNC dynamic tool MODIG*
- *Large size milling machines for glare and CFK/GFK*
- *Routing machines for plastic or composites structures*

ENGINES

- *Additive manufacturing in Titanium alloys, EBM process (ARCAM), Selective Laser Melting for metals (SLM Solutions), Direct metal deposition (OPTOMECH)*
- *5/6 axes milling machines for aerofoil, blisks, blades*
- *Large scale machining center with very high accuracy for engine carters ,Jig boring machines MIKROMAT*
- *Broaching machines COLONIAL*
- *Axle turning WEILER, landing gear SAFOP*
- *Deep boring machine UNIOR*
- *Vertical CN lathe, simple or double column, table from 500 mm to 6000 mm : MARIO CARNAGHI*
- *Very high accuracy turning (vertical/horizontal) HEMBRUG*

SPECIAL AEROSPACE

Our machines dedicated to Aerospace Industry and Composites Applications

COMPOSITES AUTOMATION

- *Fabrics cutting system, manual or automatic table EASTMAN*
- *Vulcanization autoclaves, Composite materials autoclaves*
- *Hydraulic heating presses, for rubber, plastic or composite applications*
- *Mono or multi spindles filament winding machines, impregnating line EHA (Bolenz and Schaeffer)*

AIRCRAFT INTERIOR

Adhesive film pasting, thermoforming, aircraft interior manufacturing LT Machinery (Laminating Technology)

- *Thermoforming machine MAAC Machinery*
- *ABS prototypes manufacturing machines (additive manufacturing: HP, RICOH)*

Contact : **MULTISTATION SAS**

29 Rue de l'Isle Celée

35 800 DINARD – France
