

In partnership with

Additive Consulting & Services

MULTISTATION, in partnership with SEGULA Technologies, provides consulting, services, training and workshops along the whole additive value chain :

- **Consulting**
 - Use-case definition, workshops, proof of concept
 - Screening and parts identification
 - Technical and/or capacity assistance
- **Design for additive manufacturing (DFAM) with SIEMENS NX**
 - Topology optimisation, lattices structures
 - Process simulation
 - 3D scan, reverse engineering, dimensional control
- **Process definition, integration and monitoring**
- **Materials, quality assurance and control**
 - Powders characterisation,
 - Computed tomography (CT)
 - Qualification and certification, traceability, ERP
- **Health, Safety and Environment (HSE)**

SEGULA Technologies, key partner of MULTISTATION for a successful AM technology integration
