

Digital and additive manufacturing

Microfactories
3D devices for fablabs
and academic

Photo Leapfrog

Non metal additive manufacturing
Composite, Plastic, Ceramic, Silicone

Photo SolidScape®

Metal additive manufacturing
DED, Binder Jetting, SLM, Hybrid & Mobile

Machine tools and composite industrialization

ADDITIV3X
explain - explore - experiment

**Consulting,
Services &
trainings**

Applications:

Aerospace, defense, automotive, railways, shipyards, power generation, composites, engineering, manufacturing, medical, dental, jewelry, academic, consumer goods...

New and second hand machines supplier:

Training, after-sales service, maintenance, purchase, sales, rental, financial engineering.
Confidential marketplace for second hand industrial equipment.

Consulting and services ADDITIV3X:

Integration of additive manufacturing technologies, technical diagnosis, Feasibility studies, proofs of concept, demonstrations, benchmarking, workshop, digital library, spare parts eligible to AM...

Microfactories

3D devices for fablabs, designers and academic

Comprehensive range of validated, tested and guaranteed rapid prototyping equipment maintained by our team: machines available stand alone or delivered by (container) package with tutorials and full service guarantee and maintenance.

E-SHOP: www.lecomptoir3d.com

Turn-key Fablab

A wide range of machines

Digital production workshop delivered to your workshop or delivered in a container

3D printers

FDM, stereolithography, DLP, SLS...

3devo
filament recycling

RAISE3D
ADVANCED PROTOTYPING

and also: Flashforge, Zortrax, Cubicon, Bofa...

3D scanners

Structured light and laser

multiscan

For jewelry and small pieces

SCANTECH

Hand-held mobile scanner

For makers and co workers

Multi-Water Jet

CO2 laser cutting

Vacuum casting

Sharebot

YETI TOOL: large format, affordable, easy to transport CNC router

Also, production line of extruded filament, laser engraving machine, embroidery, vinyl cutting, water or hot wire cutting, desktop milling machine, thermoforming machine, router...

All these machines presented in our new demo center in Saint-Malo.

Non metal additive manufacturing

Resins, high performance polymers, wax, ceramic and composites

Jewelry and wax

SolidScape: range 5300, Muse, Flashforge

Imprimantes 3DFDM de grandes dimensions

bigrep

Ceramic

ADMATEC: DLP resin + ceramic powder

Thermoplastics pellets

CARACOL: thermoplastic 3D printing on robots

Materials

Euro-Composites®

Honeycomb and lightweight structure

EURO-COMPOSITES® supplies not only sandwich panels and standard honeycomb core products, but also complete customized hybrid assemblies.

and also: SLA Zrapid, BigRep, Vshaper...

Additive manufacturing

Different complementary metal processes

Selective Laser Melting : Sharebot,
Prima Additive, Profeta, large size BLT
Micro laser sintering : 3D micro Print

WAAM
Plasma Arc SBI

TITOMIC: Kinetic Fusion
Additive Manufacturing « COLD
SPRAY » technology

Hybrid or Mobile

Hybrid multi-process Metrom :
5A milling, WAAM, LMD, thermoplastic printing...

3D LAB

Ultrasonic atomizers small batch

MELTIO M450, M600

Robot Cell Laser Wire
or Meltio M450

EXONE

sand powder binder jetting

For sand casting foundries or Binder Jetting

Metal powder

DFAM, design for additive manufacturability, complete software suite from design to manufacturing

Topology optimization & lattice
structures generation

Simulation

Magics, Matrix Gold,
Gemvision

Post traitement

Finishing milling

KERN Micro Solution

Heat treatment Furnaces

Fusion Factory from XERION:
Integrated AM solution for
complex metal and ceramic parts

ADDITIV3X Consulting, Services & Trainings

explain - explore - experiment

Our consulting, services and training programs support our customers throughout their additive manufacturing journey.

Use cases
identification

Pilot projects

Trainings

Services:
3D scanning, design &
manufacturing. Manufacturing of
POC (proof of concept)
all processes

Health, safety
and environment

ADDITIV3X

explain - explore - experiment

We support you for a successful implementation of additive manufacturing processes in your company. We offer in partnership with engineering companies the services to identify the most relevant use cases, we identify with you which of your parts are eligible for additive manufacturing, we optimize the design.

Secure your investments !

ADDITIV3X helps you define your specifications and qualify the applications, materials and processes upstream of an investment in a software or a machine. With ADDITIV3X, you outsource technology watch, R & D and production in additive manufacturing.

Machine tools and industrial equipment

Multistation delivers since 1987 complex and heavy machine tools for different niches.

Aerospace machines

- Large-size manufacturing of aerostructures and sections
- HAMUEL: Manufacturing of engine parts, blades, blisks machining or compressor wheels
- UNIOR: deep drilling and multi spindle production machines for automotive industry

Composites

Eastman

- EASTMAN textile cutting
- LT MACHINES: heat & vacuum applicators, hot drape formers
- Automated Fiber Placement INGERSOLL

Heavy duty machine tools

WALDRICH COBURG

- Large milling gantry and vertical lathes WALDRICH COBURG
- LINSINGER production saw and bevelling machine for thick plates
- Vertical Lathes MARIO CARNAGHI
- MIKROMAT 5-axis gantry milling machine

Composites

- AUTONATIONAL filament winding
- Autoclave for composites PANINI
- CEVOTEC Fiber Patch Placement | Flexible lay-up technology

Railways maintenance

- Wheel lathe
- Hydraulic press for wheel setting
- Train washing machine

High precision

Finepart
connection AB

- FINEPART: High precision waterjet cutting system
- WATERJET : Large format waterjet machine
- Micromachining KERN
- Grinding machines MIKROMAT

Digital and additive manufacturing machines by Multistation SECOND LIFE

International market place developed since 2002

Your partner in technology assets management: investments, misinvestments, desinvestments, production relocation, liquidations, auctions.

Brokerage activity, under confidentiality agreement

Origin of machines: worldwide machines manufacturers, European banks, leasing companies and leading firms in automotive, aircrafts industry, railways, universities...

Sales of used machines, plant transfers or workshop closing... Auction sales or private treaty Relocation.

Audit and inspection of the machine - Diagnosis - Needs assessment - Benchmarking - Procurement - Renting - Logistic - Packing and transportation - Training - Technical support and maintenance - Financial engineering...
