## Raplas Appoints Multistation as Sales Partner in France

*Expanding Access to High-Performance Additive Manufacturing Solutions in a Key European Market*

Raplas, a UK-based leader in large-scale industrial additive manufacturing, has signed a collaboration agreement with Multistation, a long-established distributor of advanced digital and additive manufacturing technologies in France. Under this agreement, Multistation will represent Raplas as its official sales partner in France, strengthening Raplas' presence in one of Europe's most important industrial markets.

### Partnership Overview

Raplas develops and manufactures high-performance large-scale SLA additive manufacturing systems, recognized for their precision, scalability, and reliability. Its resin-based platforms are used across industries including aerospace, automotive, medical, and industrial tooling, enabling manufacturers to move beyond prototyping to real-world production of end-use parts.

Multistation has built a strong reputation as a trusted partner for French industry. The company distributes a wide portfolio of digital and additive manufacturing solutions, supporting customers in aerospace, automotive, energy, and research. With decades of market knowledge and a dedicated service team, Multistation is well positioned to bring Raplas' advanced systems to French manufacturers.

## Benefits for French Industry

The collaboration gives French companies direct access to Raplas' portfolio, supported locally by Multistation's sales and technical experts. Customers will benefit from:

- **Proven industrial technology** – Raplas systems designed for high precision and production scalability.
- **Local expertise and support** – Multistation's established presence and technical service in France.
- **Application versatility** – Solutions addressing tooling, aerospace, automotive, and medical needs.
- **Sustainability impact** – Additive manufacturing enables reduced waste and lightweight designs.

As France accelerates its Industry 4.0 adoption, this partnership positions both companies to support innovation and competitiveness across key sectors.

### Richard Wooldridge, CEO of Raplas, said:

*"France is a strategic market for Raplas, with leading industries adopting additive manufacturing at scale. We are delighted to partner with Multistation, whose expertise and customer relationships make them the ideal representative of our technology in France. Together, we will help French manufacturers unlock new levels of performance and productivity."*

### Yannick Loisan, CEO of Multistation, added:

*"At Multistation, our goal is to bring the best international technologies to French industry. Raplas perfectly complements our portfolio, offering reliable and scalable solutions for production. We look forward to building success together and supporting our customers with Raplas' advanced systems."*

## About Raplas

Raplas is a UK-based manufacturer of advanced additive manufacturing systems, specializing in high-performance resin-based technologies for industrial customers worldwide. Its solutions serve aerospace, automotive, healthcare, and tooling industries.
